Date of birth: 16/05/1999 Nationality: Indian Address: Siolim, Bardez, Goa 403517, India.

PROFILE

Senior Software Engineer with 5 YOE, specializing in backend development, database design, and system architecture. Experienced in building performant APIs using Node.js - Express.js & NestJS, along with designing scalable and performant SQL databases. Skilled at translating complex business requirements into scalable, maintainable, and high-performance technical solutions.

WORK EXPERIENCE

Senior Software Engineer 1 (Backend / NestJS) 02/2026 – present
Geekyants - BTM Layout, Bangalore, India.

- **Architected and developed scalable backend systems** from the ground up, owning database design, REST API development, and key architectural decisions across multiple products.
- **Designed and optimized relational database schemas** with well-defined relationships, constraints, and indexing strategies to ensure data integrity, scalability, and high performance.
- **Built production-grade REST APIs using NestJS**, applying clean architecture and backend best practices while collaborating with cross-functional teams to deliver robust technical solutions.

Freelance Backend / Full Stack Developer (MERN) 01/2024 – 01/2026

- **JOY IT Solutions (Turing.com)** - Bengaluru, India (Remote)
Worked on SFT project - created complex datasets for training LLMs and improving their performance.
- **Kilowatt** - Porvorim, Goa, India.
Built & maintained React.js / React Native applications, ensuring stability and performance.
- **Future Forward Foundry** - SF, USA (Remote)
Built AI-powered PRD automation system using Python, CrewAI, & LLMs.

Junior Software Engineer (Backend) 10/2021 – 11/2023
Grassdoor Logistics Technologies - Verna, Goa, India. (Remote)

- **Designed and implemented high-performance REST APIs** using **Node.js** and **Express.js**, achieving a **30% improvement** in system response times.
- **Optimized slow Legacy SQL queries, improving performance by 30%.**

PROJECTS

Order Processing System:

- Built a scalable, event-driven system with **Node.js**, **MongoDB** and **Redis** to process orders asynchronously using **AWS** (SQS & SES) with automated **email notifications**.

PRD Automation:

- Built a Python-based system to auto-generate detailed Product Requirement Documents from transcripts of casual conversations between clients and product managers using CrewAI (DeepEval)

PUBLICATIONS

Diabetes Mellitus Prediction System 05/2022

EDUCATION

B.E. in CS - Padre Conceicao College of Engineering - Verna, Goa, India. 06/2017 – 08/2021

SKILLS

Languages: JavaScript, TypeScript, Python, Java, php, C, C++

Backend: Node.js, Express.js, Nest.js, Redis, MySQL PostgreSQL, MongoDB, supabase, JWT, RabbitMQ, PM2

Frontend: React.js, Next.js, React Native, HTML, CSS, Styled Components

DevOps & Tools: n8n, Docker, AWS, Nginx, Git, JMeter, Apache Bench, Linux, Postman, VS Code

Other: CrewAI, FFmpeg, Figma, Ollama, OpenCode, Codex, Antigravity, ClaudeCode
